## Exercise and Bronchial Provocation Testing Only - withholding times prior to test

|                 | <b>Bronchial Provocation: Mannitol, Hypertonic Saline, Histamine Challenge, Cardiopulmonary Exercise Test</b> |
|-----------------|---------------------------------------------------------------------------------------------------------------|
| <b>8 Hours</b>  | Airomir, APO, Asmol, Bricanyl, Intal, Tilade, Ventolin                                                        |
| <b>12 Hours</b> | Atrovent, Brimica, Flutiform, Pulmicort, Qvar                                                                 |
| <b>24 Hours</b> | Alvesco, Anoro, Breo, Foradile, Incruse, Nuelin, Oxis, Serevent, Seretide, Spiolto, Symbicort, Theo-Dur       |
| <b>3 Days</b>   | Bretaris, OnBrez, Seebri, Spiriva, Ultibro                                                                    |
|                 | <b>Anti-histamines</b>                                                                                        |
| <b>3 Days</b>   | Avil, Benadryl, Claratyne, Claramax, Periactin, Phenergen, Polaramine, Telfast, Zadine, Zyrtec                |
| <b>4 Days</b>   | Singulair                                                                                                     |

**Ingestion of food containing caffeine should be withheld on the day of the test, as it can decrease bronchial hyper-responsiveness.**

**Smoking and vigorous exercise should not be undertaken on the day of the test.**

### Rockhampton - Mater Misericordiae Hospital

Suite 1, Level 1

31 Ward St

Rockhampton Q 4700

P: (07) 4807 6512

F: (07) 4807 6513

E: [rockhampton@qldrespiratory.com.au](mailto:rockhampton@qldrespiratory.com.au)

## Cardiopulmonary Exercise Test

Day of test - avoid heavy meals, smoking and alcohol consumption. Wear comfortable shoes and clothing for riding a bike. On the day of the test report to Reception, Level 2, Suite 26 Wesley Medical Centre, Wesley Hospital at the appointed time. A doctor will be present for the testing.

## Allergen Skin Prick Test

72 hours before test - do not take antihistamines e.g. Claratyne, Avil, Zyrtec etc.

Note: Mood stabilisers (e.g. Endep, Avanza) can cause a false negative test.

Please inform staff when making your booking if you are taking prednisolone.
